Hazardous Weather

Day 1 Weather Hazards

Valid: 0800 Thu - 0800 Fri

Marginal risk of severe thunderstorms with gusty winds/hail possible along with areas of localized flash flooding

Flash flooding possible

Locally heavy rain with isolated flash flooding in NM, especially in/near burn scar locations

- Very Common – Happens Often
- Common – Happens Frequently
- Uncommon – A Few Times a Year
- Rare – Once Every 1-5 Years
- Very Rare – Once Every 5-10 Years

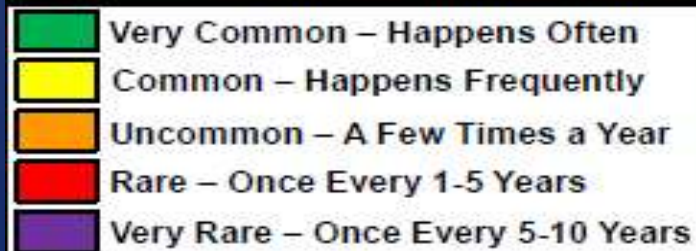

*Threat levels are based on FEMA Region 6 criteria. State or local threat level criteria may differ.

Hazardous Weather

Day 2-3 Weather Hazards

Valid: 0800 Fri - 0800 Sun

Areas of flash flooding
Possible over NM
especially in/near
burn scar locations

*Threat levels are based on FEMA
Region 6 criteria. State or local
threat level criteria may differ.

Hazardous Weather

Moist unstable air will continue to flow into southern New Mexico and west Texas today and tonight with showers and thunderstorms moving across much of the region. A few storms may produce heavy rainfalls and cause localized flooding...hail and damaging winds. High temperatures will be in the upper 80s and lower 90s lowlands with mostly upper 60s to upper 70s mountains.

*Rain for some areas this morning, then
More thunderstorm activity late this afternoon*

Temperatures will warm up today but will still be below normal with highs mainly in the middle 80s to near 90. A few showers and thunderstorms will persist from the central South Plains into the Rolling Plains this morning. Late in the day, scattered t-storms will move into northern and western portions of the area. A few storms may persist into the night.
